## Test of Sorbent Performance of Adsorbents

Your product, named "Sanol skum" (polymer foam), has by us been tested on the performance in removing nonemulsified oil. The results are:

- Weight (g) adsorbed oil per weight (g) product:  $35 \pm 7$  g oil/g product
- Weight (g) adsorbed oil per volume (mL) product:  $0.3 \pm 0.07$  g oil/mL product

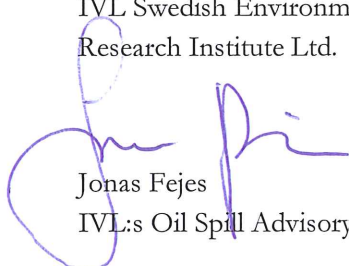

Method used:

ASTM F726 - 12 Standard Test Method for Sorbent Performance of Adsorbents

Viscosity of oil in test: 15 cSt at 20°C

Yours sincerely

IVL Swedish Environmental  
Research Institute Ltd.
